

## Example of a Successful Application Weather Protection for Exterior Surfaces

A major European distributor uses [Thortex Aqua-Tech W.P.](#) to successfully prevent weather damage to buildings. This provides added value in PROTECTION of assets and ENHANCEMENT of visual appearance!

This excellent product has major market appeal in both Commercial and Industrial sectors. Most of your end-users will have a requirement to protect and enhance their assets

[Thortex Aqua-Tech W.P.](#) is a high performance, simple to use non-silicone transparent water repellent system designed for application to exterior surfaces.

It is based upon a unique blend of water repellent resins, specifically developed to produce a coating which provides up to 10 years water repellence on a wide range of exterior surfaces including concrete, asbestos, brickwork, natural and artificial stone without affecting the natural appearance of the surface.

[Aqua-Tech W.P.](#) is micro-porous, allowing the material beneath to breathe and meets the requirements of BS6477:1984 for brickwork and masonry surfaces. It is supplied ready for use as a single component polymer. One coat is usually sufficient.

The brickwork prior to blasting and coating  
(This preparation stage can include graffiti removal)

Using simple air blasting equipment to prepare the surface

All that is required to successfully prepare the surface if badly marked or damaged.

It is NOT normally necessary to blast clean the surface UNLESS embedded graffiti marks must be removed, as in this example.

Simple brushing with a stiff bristle brush is usually perfectly acceptable for surface preparation. Nothing could be easier!

Aqua-Tech W.P is ready for application straight from the container!

Application by hand-spray equipment. Simple but effective and cost effective.  
This product can also be applied by brush or roller system - as required.

Application of Aqua-Tech W.P is always started at the highest point of the structure and then continued downwards.

This photograph shows the COMPLETE EFFECTIVENESS of Aqua-Tech  
W.P.  
in protection of the wall surface against any form of water penetration.

The Final Result!

The building looked absolutely terrific AND added value to the property - as well as ensuring protection of the assets for many years to come!
